

BIS Update: Extension of date of enforcement for Mandatory Certification for various chemicals

INSIGHTS

June 6, 2023

Dear Reader,

We are writing to you with an important update regarding mandatory registration requirements applicable to imports of **various chemicals** into India.

Background	The Government of India has on May 26, 2023, amended the date of enforcement of the existing Quality Control Order for Methyl Acrylate, Ethyl Acrylate and Vinyl Acetate Monomer . Producers of this product will now have additional time to obtain BIS certification for their products. The relevant order is available here						
Products concerned	<p>The date of entry into force of the existing Quality Control Order for the following chemicals has been extended:</p> <table border="1"><thead><tr><th>Product</th><th>Date of Entry into force</th></tr></thead><tbody><tr><td>Vinyl Acetate Monomer</td><td>February 29, 2024</td></tr><tr><td>Methyl Acrylate, Ethyl Acrylate</td><td>February 29, 2024</td></tr></tbody></table> <p>For an updated list of all products under mandatory BIS certification, please click here.</p>	Product	Date of Entry into force	Vinyl Acetate Monomer	February 29, 2024	Methyl Acrylate, Ethyl Acrylate	February 29, 2024
Product	Date of Entry into force						
Vinyl Acetate Monomer	February 29, 2024						
Methyl Acrylate, Ethyl Acrylate	February 29, 2024						
Next Steps	<p>As per the notifications, producers of these chemicals will now have additional time to secure BIS certification before these orders come into force. Once these orders come into force, both domestic and foreign manufacturers of these products will only be able to export/sell in India with a valid BIS license in place.</p> <p>To obtain such license, both foreign producers and domestic manufacturers of these products would need to submit an application to the BIS seeking certification. Furthermore, the process of certification will also require physical testing and inspection of the relevant chemicals at the factory premises as well as parallel testing by a BIS authorized laboratory in India to verify the same. BIS certification is a time-consuming process and therefore it is recommended that interested producers make applications for certification at the earliest in cases wherein Quality Control Orders have been issued and are pending enforcement.</p>
