

## BIS Update: Extension of Mandatory Certification for Ethylene Glycol

INSIGHTS

December 29, 2022

Dear Reader,

We are writing to you with an important update regarding mandatory registration requirements applicable to imports of **Ethylene Glycol** into India.

<b>Background</b>	The Government of India has on December 29, 2022 amended the date of enforcement of the existing Quality Control Order for <b>Ethylene Glycol</b> . Producers of this product will now have additional time to obtain BIS certification for their products. The relevant order is available <a href="#">here</a> .				
<b>Products concerned</b>	<p>The date of entry into force of the existing Quality Control Order for the following chemical has been extended:</p> <table border="1"><thead><tr><th>Product</th><th>Date of Entry into force</th></tr></thead><tbody><tr><td>Ethylene Glycol</td><td>March 28, 2023</td></tr></tbody></table> <p><b><a href="#">For an updated list of chemical products under mandatory BIS certification, please click here.</a></b></p> <p><b><a href="#">For an updated list of steel &amp; iron products under mandatory BIS certification, please Click Here</a></b></p>	Product	Date of Entry into force	Ethylene Glycol	March 28, 2023
Product	Date of Entry into force				
Ethylene Glycol	March 28, 2023				
<b>Next Steps</b>	<p>As per the notifications, producers of these chemicals will now have additional time to secure BIS certification before these Orders come into force. Once these Orders come into force, both domestic and foreign manufacturers of these products will only be able to export/sell in India with a valid BIS license in place.</p> <p>To obtain such license, both foreign producers and domestic manufacturers of these products would need to submit an application to the BIS seeking certification. Furthermore, the process of certification will also require physical testing and inspection of the relevant chemicals at the factory premises as well as parallel testing by a BIS authorised laboratory in India to verify the same. BIS certification is a time-consuming process and therefore it is recommended that interested producers make applications for certification at the earliest in cases wherein Quality Control Orders have been issued and are pending enforcement.</p>
